

Luxembourg
Commercial
Internet eXchange

LU-CIX

The Smart Alternative

Connecting to LU-CIX:

The Smart Alternative to established European Internet eXchange points.

About LU-CIX

- > LU-CIX stands for Luxembourg Commercial Internet eXchange. LU-CIX was founded in 2009 based on a cross-industries initiative with the aim of developing the Internet in Luxembourg.
 - > The LU-CIX model of openness and neutrality is based on the philosophy of already existing international centers.
 - > Thanks to LU-CIX, companies generating IP traffic and attracted to Luxembourg by the favorable economic environment, are now in a position to find all the means and tools to carry their traffic to all Internet users around the world.
 - > This Internet eXchange point will permit Internet service providers to eXchange Internet traffic between their networks, and thus directly connect the content providers with the international Internet operators.
- > LU-CIX is divided into two key entities: LU-CIX a.s.b.l., a non-profit organization which promotes the new structure as a major Internet platform, and LU-CIX Management GIE, an Economic Interest Group that runs the technical backend.

Our Team

Our dynamic and young, nevertheless very experienced team is dedicated to deliver flexible and creative solutions with the highest degree of satisfaction to maximize our costumers' value.

Quick facts

- > A Cross Industries Initiative
- > Spirit of Openness and Neutrality
- > State-of-the-art Foundry Switching Platform
- > Carrier Independent
- > From 100M to 10G ports
- > IPv4 and IPv6 Peering
- > Private VLANs
- > Hosted by two Tier 4 Datacenters
- > Quality-of-Service Peering

Why LU-CIX?

- > Located at the heart of Europe and at the crossroads of European Internet traffic routes.
- > LU-CIX is more than an Internet eXchange, it is a distribution platform for new creative Internet services.
- > Thanks to its proximity to other Internet hubs such as Frankfurt, Amsterdam, or London, LU-CIX presents a smart alternative to established Internet eXchange points.
- > By choosing LU-CIX, you will opt for a location that is dedicated to excel in the networked world. LU-CIX is also the facilitating infrastructure that will allow you to develop your e-commerce and business opportunities in the most optimized way.
- > The traffic routes through Luxembourg are not overbooked or congested. Carriers available at LU-CIX rely on generously dimensioned lines that offer improved roundtrip times.

Our Services

- > LU-CIX provides all the benefits of an open and neutral Internet eXchange.
- > We operate a state-of-the-art Foundry switching platform. Customers can be connected by FE, GE and 10GE ports.
- > Our services comprise Public Peering, Quality-of-Service Peering, Multicast and Private VLANs at attractive prices.
- > The LU-CIX platform supports IPv4 and IPv6 and is hosted in two distinct Tier-4 datacenters.

The Luxembourg Advantage!

Luxembourg is one of the hottest locations when it comes to media and ICT activities. RTL, Europe's leading broadcaster, and SES, the world's preeminent satellite operator, are both headquartered in Luxembourg.

A number of world-famous companies and leaders in the e-commerce field have chosen Luxembourg to host their servers. The Luxembourg Government's policies are dedicated to the support of ICT activities. Luxembourg has become a prime location for doing business.
